Building a Better Hardin, One Student at a Time

Dear Hardin Parents and Community,

As the 2020/2021 school year approaches, the Texas Education Agency, or TEA, has begun sending information to school districts concerning back to school procedures.

We would like for you to know that Hardin ISD is aware of changes being made by Governor Abbott and TEA. We are currently utilizing a group of teachers, administrators, and school staff to begin planning for the start of our new year. This committee is addressing issues such as education, nutrition, transportation, communication, technology, and most importantly the safety and well-being of our students and staff.

Next week, our Technology department will be sending out a Parent Survey. We would like to know your thoughts about starting this school year. Links to this survey will be available on the Hardin ISD website, and the District's Facebook page.

Currently Hardin plans to start school on August 13th. However, please be aware that changes are continually being made by TEA and Governor Abbott surrounding Covid-19, and our district is preparing for a number of possibilities concerning all areas of school.

Hardin looks forward to a successful start to the 2020/2021 school year. We appreciate our community and parent support, and look forward to reviewing your concerns via the parent survey.

Thank you.
